CELERY

CULTURE.—Sow seeds in light rich soil, as early as ground can be worked, in drills 8 or 10 inches apart, cover seeds about a quarter of an inch deep, rolling or treading them if ground is dry. When fairly out of seed leaf transplant or thin from 6 to 8 inches apart in the row, and let grow until wanted to plant out. Keep well wet down in dry weather. Set out in July, 6 to 8 inches apart, (press soil firmly against roots), in single row in shallow trenches, having previously worked a good quantity of well rotted manure in bottom of trench. It is well to work thoroughly into the soil under and around the trench a quantity of Our Garden Fertilizer. To raise good celery requires rich soil. Earth up two or three times, taking care not to let the earth get into the heart of the plant.

FR. Mais
GER. Mais
POL. **CORN**
IT. Mais
(SWEET OR SUGAR)

CULTURE.—Plant in hills 3 ft. apart each way, and five or six kernels in a hill. Hoe often, drawing soil up to stem after first hoeing. Break off side shoots. Make ground very rich. If stable manure is used, it is perhaps best to plow it under. Use broadcast or in the hill Our Garden Fertilizer, worked well into soil. It has been found very beneficial to sow these fertilizers between the rows before cultivating and hoeing the second time.

We have been very careful in selecting the best and sweetest varieties of corn adapted to this section. The list below is arranged in order as they would mature. If two or more varieties are selected and planted at the same time, they would be ready for the table at different times, one following the other.

American Mushrooms

CULTURE—Mushrooms are more easily cultivated than many people imagine and may be grown in any room or cellar where the temperature can be maintained at from 50 to 65 degrees. For the beds use a mixture of three parts horse droppings and one part good fresh loam. Before being placed in the bed, let the manure be put in some dry place to sweeten, mixing it thoroughly and turning it three or four times, when the loam may be added. Upon a dry firm bottom, make the bed by spreading a thin layer of the prepared mixture, pounding it firm, and continue this, till the bed is twelve inches thick. Leave it thus for about a week, or until the temperature has subsided to 85 degrees. Then make holes about ten inches apart, and put in each a piece of spawn about the size of an egg. Press the spawn firmly into the compost about two inches, leaving the top uncovered to allow the excess of heat and moisture to pass off without injury to the germs. After ten days, fill the holes and cover the whole bed with two inches of fresh loam, and over this place a few inches of straw. If the temperature is right, mushrooms will appear in six or eight weeks from the time of spawning. The bed will continue bearing from four to six weeks. If the surface of the bed becomes dry at any time, it should be moistened freely with water at a temperature of 90 to 100 degrees.

Our stock of spawn is replaced a number of times during the season and is giving excellent results

CULTURE.—For Peas, light dry soil is best. Sow as early as ground can be worked, and again every ten days for succession. Peas may be sown as late as August 15th. Medium and late Peas must be planted early. Early Peas may be planted early or late, and the extra early very late. Sow in single or double rows from 4 to 6 feet apart, according to variety, and about an inch apart in the row and 4 in. deep. Hoe often, keep ground clean and fine. Most Dwarf Peas will bear better if bushed enough to keep them from the ground. If the pea louse attacks the vines, spray every day with clear water of the same temperature as the atmosphere, using force.

HIGH STANDARD PAINT

A house paint that sets a standard for excellence

HIGH STANDARD LIQUID HOUSE PAINT opens the way for greater service and satisfaction for both the painter and home owner. For the painter, it allows him to give the highest type of finished work; for the home owner, it gives satisfaction through maximum beauty and protection. High Standard is a ready-mixed paint of highest quality. It contains the correct proportions of the best materials obtainable. It is easy to apply, is unsurpassed in covering and gives genuine protection and beauty for a long period of time. The cost of the paint job is lower with High Standard because of its superior quality.

QUICK-DRYING ENAMEL brushes on anything—woodwork, furniture, glassware, pottery, metalware and plaster. It gives good service on either interior or exterior surfaces. It flows on smoothly and levels out without brush marks, dries quickly and hides so well that one coat is usually enough. Easily cleaned with soap and water.

VARNISHES are made over many different formulas. They are Floor, Rub-Tone, Linoleum, Interior and Spar—one for every particular varnish requirement. Neptunite Varnishes are all heat-proof, water-proof and mar-proof; are clear, easy-flowing varnishes that never turn white—won't even scratch white. All are quick-drying.

MELLO-GLOSS is a medium gloss wall finish for use on plaster, metal, burlap, wood and concrete surfaces. Covers 500 to 700 square feet per gallon, one coat. It is easy to apply, very durable and may be repeatedly washed with soap and water without injury to the finish. Mello-Gloss is an ideal time and labor saving paint.

SUPER-SEALER is an unusual primer designed for use on all interior walls. It is a pigmented primer that combines the size coat and the first coat of paint, thus requiring but

two applications for the finished job. If necessary, Super-Sealer may be applied to temporarily damp walls.

NEPTUNITE VARNISH STAIN is a quick-drying varnish stain for renewing the finish on furniture, floors and standing wood. It stains and varnishes in one operation, and dries for recoating in from four to six hours. It is thoroughly water-proof and may be washed with soap and water. It gives good results on either wood or metal.

FLOOR ENAMEL possesses, to an exceptional degree, the requisites of a solid protective coating for interior floors, woodwork and similar surfaces. It is quick-drying, easy-working, tough, elastic, serviceable and convenient to use. It has good gloss, hides and covers exceptionally well and is easily kept clean by wiping with a damp cloth.

PORCH AND DECK PAINT is a hard varnish paint of high standard quality, designed for exterior wood and cement floors. It is an especially tough paint—made to withstand the hard wear to which porch floors are normally subjected. Works easily, dries quickly, looks well and wears splendidly.

MELLOTONE is a flat interior wall paint for use on plaster, wallboard, steel ceilings, woodwork, canvas, hot water pipes, steam radiators and similar surfaces. It is an oil paint that is easy to apply and dries to a velvet-like finish that may be washed with soap and water. Mellotone wall colors are durable and non-fading.

RICH-TONE SHINGLE STAIN is a durable pigment stain, in liquid form, made from the most permanent pigment and oils. Its permanent pigment assures good wearing qualities—thus preserving the wood, preventing decay and beautifying for a longer period of time. For brushing, one gallon will cover about 100 square feet, two coats.

IRON ENAMEL made especially for painting stove pipes and other iron surfaces. It gives a fine luster, withstands heat and prevents rust.

STANDARD BARN PAINT—A paint of high quality. It has unusual covering and spreading capacity.

STANDARD METALLIC PAINT—A paint especially designed for metal roofs, bridges, iron tanks, smoke stacks and similar surfaces. For galvanized iron surfaces use Lowe Bros. Galvanized Iron Primer before applying Standard Metallic paint. One gallon will cover 500 square feet one coat.

LINOLEUM LACQUER being water white will not discolor the lightest pattern. It dries for use in an hour and produces a hard, durable surface that brings out the beauty of color and design.

LOWE BROS. PAINT AND VARNISH REMOVER—A heavy liquid designed to remove paint, varnish, shellac from ALL surfaces. It contains no alkali, acid or water and is non-injurious to the skin.

SHELLAC—Lowe Bros. shellac is of the highest quality because it contains nothing but gum shellac and special denatured alcohol.

TRUCK AND TRACTOR PAINT—This product is an enamel paint of good gloss and great durability. It is especially adapted for keeping truck, tractors, wagons and implements well painted and in excellent condition.
